PROFESSIONAL SUMMARY

Motivated Information Technology professional transitioning into the IT and cybersecurity field with a strong foundation in customer service, problem-solving, and technical documentation. Actively developing hands-on technical skills through structured cybersecurity training, GitHub portfolio development, and practical labs covering computer fundamentals, operating systems, networking, SQL, Python, and JavaScript. Recognized for adaptability, communication, attention to detail, and a strong work ethic developed through leadership, security, retail, and warehouse experience. Seeking an opportunity to contribute, continue developing my technical skills, and grow within an Information Technology or Cybersecurity team.

TECHNICAL SKILLS

Operating Systems: Windows • Linux (Beginner)

Networking: Networking Fundamentals • IP Addressing • MAC Addresses • ICMP • Basic Network Troubleshooting

Development Tools: Visual Studio Code • Command Line

Programming & Databases: Python (Beginner) • JavaScript (Beginner) • SQL (Beginner)

Version Control & Documentation: Git • GitHub • Markdown • Technical Documentation

Professional Skills: Customer Service • Technical Troubleshooting • Problem Solving • Communication • Team Collaboration • Time Management

TECHNICAL PROJECTS

Root & Repository | Personal Technical Portfolio

- Design and maintain a structured GitHub portfolio documenting my journey into Information Technology and Cybersecurity.
- Create and maintain professional Markdown documentation for hands-on labs, technical concepts, and practical exercises.
- Utilize Git and GitHub for version control and project management.
- Maintain organized repositories demonstrating continuous technical growth and professional documentation practices.

TryHackMe | Hands-on Cybersecurity Training

- Complete hands-on cybersecurity and IT labs covering computer fundamentals, operating systems, networking, software, databases, and security concepts.
- Document completed rooms with handwritten study notes, technical write-ups, screenshots, and GitHub documentation.
- Reinforce technical concepts through practical exercises and guided labs.

Root & Repository Cybersecurity Academy

- Develop and complete structured technical assessments to reinforce knowledge gained throughout my learning journey.
- Complete written examinations, practical exercises, reflection reports, review guides, and mock interviews.
- Track long-term technical progress through structured learning milestones.

PROFESSIONAL EXPERIENCE

Amazon – Davenport, FL

Sortation Associate | November 2025 – July 2026

- Process inbound and outbound customer packages in a fast-paced fulfillment environment while maintaining accuracy and productivity.
